FINANCIAL AND COMMERCIAL. MOSEY MARKET

WEDDINGDAY, March 26—6 P. M.
The stock market opened active and buoyant this norning, and continued so to the close. Eric, Read. ing, and Cleveland and Toledo were the most active. The demand for the latter was greater than we have known for some months. The sales at the first board figure up about three thousand shares, openag at 794 and closing at 804 per cent. There was a a e at 81 per cent, buyer sixty days. All the Westetter prices. Galena and Chicago sold at 1141 per cent, and only a few shares could be obtained at that price. Michigan Southern closed firm at 96 per cept, and the offers to sell were not large at that price. Milwaukie and Mississippi Railroad closed 864 per cent, seller three days. There are large orders in the street for this stock, but it not be obtained in any quantity. A few days some small lots were sold at 83} per cent, but ndred or two shares could not now be obtained nder 88 to 90 per cent. It is worth to-day every cent of par. It is a source of satisfaction to us to know that we have been instrumental in turning public attention to investments in the stocks of railroads located in States bordering on the Mississippi line. Railroads of that section are far preferable to those of the East, both for security and productiveness. Cheaply constructed, as a general thing well managed, with large earnings, remunerating prices, moderate operating expenses, there is everything in their favor, compared with the extravagantly constructed, miserably managed, expensive, non-productive roads of the East. There were large sales of Erie this morning, at a slight improvement. We understand that a report is about being put forth reviewing the company's operations for the past year, and setting forth the future policy of the management. It is pretty well known that large expenditures are about being made on the Jersey shore, between Jersey city and Hoboken, for the Eric Railroad Company. It is proposed to tunnel Bergen Hill, and straighten the line of track from the interior to tidewater. This, with the purchase of land for depots and docks, will require a wast expenditure, all of which must be directly or indirectly assumed by the Eric Railroad Company. It would not be a high estimate] to put down this cutlay at two millions of dollars. Lower estimates may be made, but this will ultimately be nearer the figure than any other. Some time ago it was reported in the street that large expeditures on account of construction would have to come out of this year's net earnings. If the construction account is actually closed there is no other alternative. Construction on a line of railroad never stops, and it must be provided for in some way, either by an increase of capital or debt, or by appropriations from met earnings. We shall be pleased to see this subject properly treated by the intelligent superintendent of the Eric Railroad. That company is, we believe, the only one in the country where the construction account is known to be actually closed, and if it can be shown that such an extensive road can be operated at fifty per cent of its gross income, and the roadway, equipage, &c., kept in proper condition, without an increase of capital stock or debt, we shall not hesitate a moment to acknowledge that Mr. McCallum has solved a problem which has long puzzled railroad stockholders in this country.

At the second board there was an active demand at improving prices, for all the leading stocks. Milwankie and Mississippi Railroad advanced 4 per cent. New York Central, ‡; Hudson Railroad, ‡; Michigan Southern Railroad, ‡; Chicago and Rock Island, †. After the board prices were very firm. Galena and Chicago, 114† bid, 115 asked; Milwankie and Mississippi Railroad, 862 bid, 87 asked; Cleveland and Toledo, 794 bid, 80 asked; Wisconsin Lake Shore Railroad, 73 bid, 73 asked. Erie closed firm at at 56½ per cent. The report will be out in a day or two, and if our information in relation to its char acter is correct, the stock will be unfavorably affected. Michigan Southern closed this afternoon firm at 96½ per cent. The tendency of Western railroad stocks is upward. There is a margin for improvement in most of them, but great discrimination should be exercised by speculators. We have more confidence in the prominent railroads of Illinois and Wisconsin than in any others, and believe that inrestments in them will pay better, immediately or remotely, than stocks of that class in any other section of the country. We have closely and carefully watched the rise and progress of the railroads of the extreme West, and know that in their construction and operation they have avoided those evilwhich have proved so fatal to Eastern companies-We do not believe there is a railroad east of Lake Erie that actually earns a dividend.

000 against the Ohio and Mississippi Railroad Com-pany, in the United States District Court at Spring-field, Illinois. The facts of the case are thus stated by a Springfield correspondent of the St. Louis Re-

publican:—
A resolution was passed by the Board of Directors of the said coad, in substance as follows:—
Whereas, since the settlement made with Page & Bacon, on the 5th day of June, 1855, and the note and deed of trust of that date given to secure the balance ascertained to be their due, this company have become indebted to the said Page & Bacon in the further sum of \$312,133 35, for money advanced by them in aid of the construction, equipment, &c., of said read, at the request of said company: Therefore—
Resolved, That Daniel R. Garrison, Vice President of said company, be authorized to execute and deliver to rage & Bacon their promissory note for the said sum of \$312,133 35, payable to order, &c.

And also, "that Daniel R. Garrison be authorized to empower any attorney of any court to confess judgment for said amount."

It seems that the note was executed in accordance with

empower any attorney of any court to consess juogment for said amount."

It seems that the note was executed in accordance with the foregoing resolution, and was subsequently assigned by Page & Bacon to H. D. Bacon, who brought suit upon the same in the United States District Court for the Southern district of Illinois, now in session at this

place.

Judgment was confessed several days since by an atterney of the court, in pursuance of a power of attorney to himself from Daniel R. Garrison. The amount of interest due on the note makes note and interest amount to about \$347,080, as before stated.

The third annual report of the Delaware, Lacks wans and Western Railroad Company gives the annexed statement of the transportation department during the year ending Dec. 31, 1855 :—

Of this amount \$61,893 21 has been appropriated to the renewal fund, to provide against the depreciation of the road and its equipment from use and natural decay.

eastward to New York, says:—

In this general view of the connections of our road mention should be made also of the Lackawana and Bloomsburg Railroad, by means of which communication will be opened with the Southwest and West. About twenty miles of the northern portion of this road will be opened for business in the ensuing spring, and the entire road will, when completed, be a valuable auxiliary to our own. In anticipation of that fact, and for other reasons detailed at length in our last annual report, this company have furnished a portion of the means requisite for its construction.

at length in our last annual report, this company have furnished a portion of the means requisite for its construction.

We have also important Northern and Northwestern broad-gauge connections via the Oswego, Binghamton, and New York, and the Lake Ontario, Auburn and New York are fire Railread. The former two, besides passing through a ferille and populous region of country, where coal will be in extensive use, and which will furnish, in resurn, agricultural products of large amount, will open a communication direct with Lake Ontario and Canada.

The Oswego, Binghamton and New York Railroad is completed and in operation from Binghamton to Syracuse, and the remaining portion of it northward will coubtless be constructed at an early day. The Lake Ontario, Auburn and New York Railroad, the building of which was suspended for a time, a now about to be resumed, with favransle prespects. Through the New York and Eric we have, as it is well known, access to a wide extent of country eastward and westward from Great Bend, into which our "Scranton ccal" has been already introduced, and is favorably regarded, with prospects of a largely increased demand for it in the future.

NEW YORK CATTLE MARKET.

WEDNESDAY, March 26, 1866.

There was a further decline in the market for beef cattle at Alierton's to-day, owing to the continued large receipts. Prices are about one cent per pound lower than last week, but when it is considered that the quality of the stock was not near so good to-day, the actual decline can hardly be called more than ½c. Taking into consideration the large number of cautle on sale (2,229 for the day, and 3,091 for the week), we have rarely seen so few good beeves at this market, and never, perhaps a larger number of interior. The top trice was lic., the average about 10., and the lowest quotations 7 a8c. The general impression among the brokers, when our reporter left, was that a goodly portion of the day's off-rings would not find buyers. Cows and calves are more plenty and dull of sale. Some fair and good qualities sold at \$35a50. Veal Calves are also becoming quite abundant, and prices have a downward inclination. Sales at 6½a7½c., as in quality. Pennand moderate. Sheep and Lambs maintain about last week's prices. Some of the best sold as high as \$15 per head. Swine are rather dull, but not lower. NEW YORK CATTLE MARKET.
